

# The single website solution for furniture brands

Clarity Cloud is the all-in-one, single-login website designed to drive sales for furniture brands. It delivers everything you need in its 5 key solutions:

## Consumer Website

Clarity websites have a fresh look and full functionality on any device and screen size, and engage Consumers with your brand to begin shopping through their Wish List.

## Dealer Portal

Build brand preference by enabling Dealers to connect online with your Sales Aids, real-time product data, and online order placement.

## Pricing Configurator

No more incomplete or undeliverable orders. Our software walks your Dealers through all aspects of the configuring and quoting process, using current data from your factory.

## Product Visualizer

Harness the power of visual selling by allowing your Consumers and Dealers to build and customize furniture pieces on-screen. The custom-built piece can easily be entered as a fully validated factory order.

## Market Showroom Automation

All the critical data from market at your fingertips. Track what pieces are popular, record comments on styles, and view the resulting data in real time. Carts created during walkthroughs can be converted to market orders instantly.

**Use these solutions independently or as a Fully Integrated Cloud Experience.**
